Stem only	-	-	-	1	~50cm	Green	S.A.	Real		D.I.Y.	Yes

### What is the difference between dried and preserved flowers?

Dried flowers are completely dehydrated and lose the original look and feel of a fresh flower while preserving flowers allows them to maintain the natural look and feel of a fresh flower.

### Benefits

- Long Lasting**  
Preserved roses don't go off or wilt, providing value for money.
- Prep Ahead**  
Avoid last-minute stress by preparing your designs in advance.
- No Waste**  
Improve your bottom line with zero waste preserved roses.
- Extended Selling Window**  
Long-lasting roses are a win-win for business and customers.
- Mix With Fresh**  
Giving you a larger arrangement at a more economical price point.

### Care Tips

- Sunlight**  
Avoid direct sunlight, roses are made for indoor use only.
- Water**  
Do not water the roses.
- Humidity**  
Avoid high humidity, the preferred storage humidity is less than 80%.
- Temperature**  
Keep at room temperature. The preferred temperature is 18-22°C.
